

European ALARA Newsletter 29th Issue - October 2011

This issue of the Newsletter is almost wholly devoted to the implementation of optimisation in the medical sector, which faces a number of new challenges: the rapid development of modern technologies and procedures involving ionising radiation; a significant increases in patient doses worldwide; associated increases in occupational exposures; and the occurrence of serious radiation incidents and accidents. With these in mind, the aims of the 13th European ALARA Workshop ("ALARA and the Medical sector") that was recently organised in Norway (7-10 June 2011) with the help of the Norwegian Radiation Protection Authority, were:

- To consider how the ALARA principle can be better implemented in the medical sector, with regard to both patient and staff exposures from diagnostic and therapeutic uses of ionising radiation.
- To bring together relevant European medical professionals, networks and other stakeholders working with the ALARA principle, to exchange practical ideas and experiences, and to identify further improvements.

FAQ ALARA

On the ORPNET webpage, IAEA proposes a list of frequently asked questions (FAQs) which intends to provide information to radiation protection specialists so that they can answer quickly and correctly the most frequently asked questions. The ALARA Newsletter proposes in each issue a selection of these FAQs
