

1st ENA Workshop & IAEA NORM Project Technical Meeting

**NORM Meeting in Katowice, Poland
19th -23th November 2018**

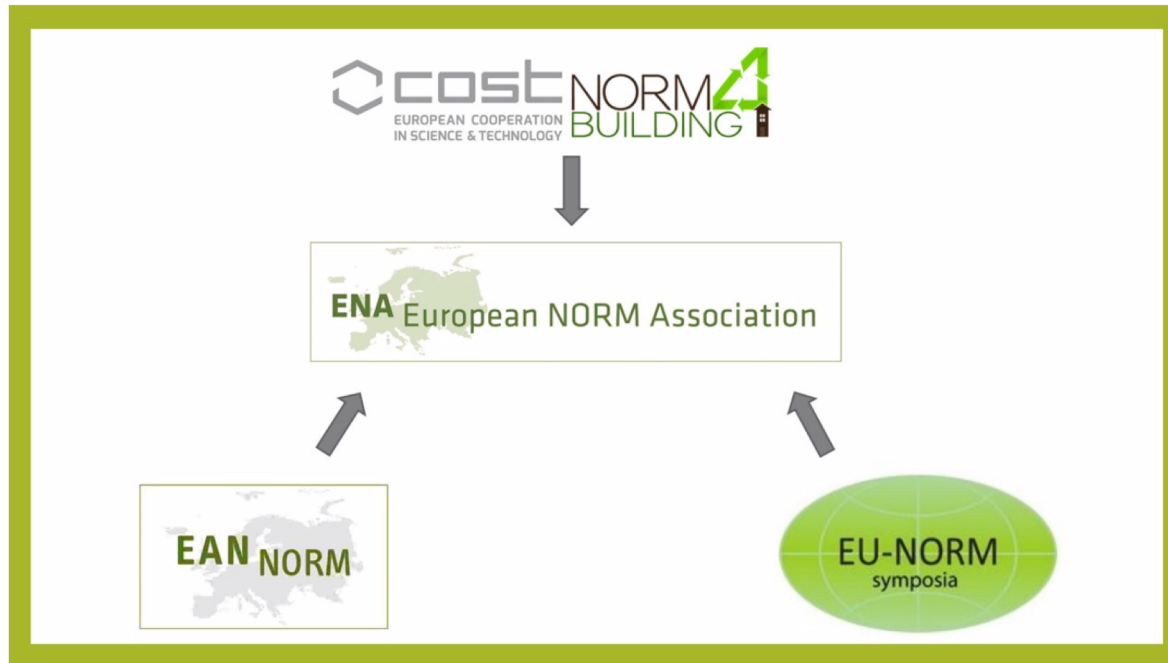

Foundation of ENA

Posted on March 15, 2018

The European NORM Association (ENA) has been formed by merging the European NORM networks **EAN_{NORM}** and **EU NORM** and was also based on the **NORM4Building** consortium.

<https://ena-norm.eu>

The **Statutes of ENA** and the **Code of Ethics** can be downloaded [here](#).

The European NORM Association (ENA) is a platform of experts from:

- industry operators and industry associations that are dealing with natural radioactivity in their raw materials, processes and residues;
- governmental and regulatory authorities in the field of radiation protection;
- service providers such as laboratories and consultants;
- research and scientific organisations.

ENA's Mission and Objectives

- Promote and advance radiation protection in the context of exposure to NORM by operating as a European platform and forum for discussion.
- Dissemination and exchange of information, training and education and by supporting scientific knowledge and new directions of research related to NORM issues.
- Support the management of NORM in compliance with EU BSS and MS legislation and according to best practice ..., and humans and the environment are protected in an optimised way that is acceptable to society.

ENA's Activities

Conferences: format similar to EU NORM Symposia

Workshops: format similar to EANNORM workshops

Network of specialist throughout EU, possibly continuing the Contact Points known from EANNORM

Unbiased counterpart at EU level for regulations and guidelines

Close links to "NORM industry" associations

Strong relationship with IRPA and national RP associations

Links with ERA and other networks

Interest of IAEA to continue close collaboration, e.g., through the ENVIRONET NORM Project

ENA and IAEA NORM Project

ENA Working groups

- NORM in building materials
- NORM in industries
- NORM in the environment

ENVIRONET NORM Project Tasks

Task 1: Report on Considerations for Developing National Policies and Implementing Strategies for NORM Management

Task 2: Guidance Document on the Assembly of Relevant NORM Information by Member

Task 3: Assessment of Costs Associated with NORM Management

Combined 1st ENA Workshop & IAEA NORM Project TM

- Important synergism with IAEA ENVIRONET NORM Project
 - contribution of people from non EU countries;
 - ENA members involved in ENVIRONET NORM Project, influence on approaches
- Many presentations in the common sessions ≈ 45 .
- Trigger for ENA WG activities
 - e.g. WG on NORM in building materials: two topics
 - fast screening methods for final products
 - Inventories of raw and final materials as support of regulation implementation
- Great interest from industrial sectors (oil and gas, zircon sand etc...)
