The quality/performance of the presentations/speakers was

Antworten (Gesamt: 8)

	Absolut	Relativ
very good	4	50%
Antworten: ▪ (4 mal)		
good	4	50%
Antworten: ▪ (3 mal) ▪ As usual in conferences, some speakers talk very fast and it is hard to understand for non-native English-speakers (1 mal)		
sufficient	0	0%
Antworten:		
not satisfactory	0	0%
Antworten:		

Further suggestions

Antworten (Gesamt: 6)

	Absolut	Relativ
This was most important/interesting for me:	5	83.33%
Antworten: ▪ Feedback from other institutes about the used of exotic isotopes; networking (1 mal) ▪ interaction between the participants - workshop participation (1 mal) ▪ lively discussions in the group, different angles (from authority to research and clinical practice) (1 mal) ▪ Significant developments enabling ALARA improvements in each of: interventional radiology, molecular radionuclide therapy and culture (1 mal) ▪ Staff dosimetry, SIRT procedures (1 mal)		
These topics have remained open for me:	3	50%
Antworten: ▪ All topics remain open (1 mal) ▪ The importance of recognizing that radiation safety culture in an organisation cannot be separated from, and is in fact strongly influenced by, the overall culture within that organisation and its safety culture. Context really is important. (1 mal) ▪ the necessary radiation protection measures for new alpha radionuclide therapies - no real overview was given, certainly not for the clinical implementation (1 mal)		
I see the following starting points for further seminars:	3	50%
Antworten: ▪ Management/Leadership recognition of the importance of ALARA and the roles & responsibilities of RPEs and (in the medical sector) MPEs (1 mal) ▪ Setting up guidelines for the clinical implementation of new (alpha) radionuclide therapies (1 mal) ▪ Staff skin dosimetry (1 mal)		
What could be improved? Do you have any further ideas, suggestions, or complaints?	5	83.33%
Antworten: ▪ I am not fan of starting monday morning and compromising my weekend (1 mal) ▪ I could be better to send the invoice in advance (e.g. 3 weeks at minimum), because in institutions like mine, they need time to register your company in their database and then pay for the subscription. (1 mal) ▪ It was a good mixture of people, but a specific meeting of staff working in hospitals would be beneficial for a focused		

multidisciplinary workshop (doctors, nurses, radiographers, physicists) (1 mal)

- no complaints. It was a well-organized en interesting meeting. (1 mal)
- Perhaps, in a spirit of learning, as well as hearing 'success stories' (e.g. fascinating technical and other developments) it would also be worthwhile to hear case studies of cases where attempts to improve ALARA have been problematic ... where significant/surprising obstacles have been encountered when seeking to implement ALARA. (1 mal)
